# Quick Start: APIs & Working Together

**Quick reference for setting up APIs and working with Auto**

---

## ■ What I Created For You

1. **`docs/API_SERVICES_OVERVIEW.md`** - Complete overview of APIs/services
2. **`docs/WORKING_TOGETHER_GUIDE.md`** - How to give me clear instructions

---

## ■ Quick Action Items

### *Recommended Services to Set Up:*

1. **GitHub MCP** ■ (Free, Very Useful)
• Helps me read moOde source code
• Check for updates
• Access issues/PRs
• **Action:** Get GitHub Personal Access Token, tell me when ready

2. **Brave Search MCP** (Optional)
• Search moOde forum and docs
• Research solutions
• **Action:** Get API key if you want it

---

## ■ How to Give Me Instructions

### *Template:*

```
Goal: [What you want]
Context: [Background]
Current: [Current state]
Want: [Desired state]
```

### *Example:*

```
Goal: Set up GitHub MCP
Context: Working on moOde custom build
Current: GitHub MCP configured but no token
Want: GitHub MCP working with my token: xxxxx
```

---

## ■ Next Steps

1. **Read the guides:**

- `docs/API_SERVICES_OVERVIEW.md` - Full API/service info
- `docs/WORKING_TOGETHER_GUIDE.md` - How to work together

2. **Decide what you want:**
- GitHub MCP? (Recommended)
- Brave Search? (Optional)
- Something else?

3. **Give me clear instructions:**
- Use the template above
- Be specific
- Provide context

4. **I'll help you:**
- Set everything up
- Test it works
- Update documentation

---

**Remember:** You're practicing! Start with simple requests, build up to more complex ones. I'm here to help! ■
