■ Commands From Home Directory

Cursor Rule: All commands should work from the HOME directory (~)

■ Correct Way (From Home)

All commands use absolute paths or `~/moodeaudio-cursor/`:

```
# From HOME directory (~)
~/moodeaudio-cursor/tools/ai.sh --status
~/moodeaudio-cursor/tools/toolbox.sh
~/moodeaudio-cursor/scripts/maintenance/PROJECT_CLEANUP.sh
```

■ Wrong Way (Requires cd)

```
# Don't do this - requires cd first
cd ~/moodeaudio-cursor
./tools/ai.sh --status
```

Quick Reference

GhettoAI Upload (From Home)

```
# Option 1: Helper script
bash ~/moodeaudio-cursor/UPLOAD_TO_GHETTOAI.sh

# Option 2: Direct command
OPENWEBUI_TOKEN='<token>' ~/moodeaudio-cursor/tools/ai.sh --upload
```

Toolbox (From Home)

```
~/moodeaudio-cursor/tools/toolbox.sh
```

Maintenance Scripts (From Home)

```
~/moodeaudio-cursor/scripts/maintenance/PROJECT_CLEANUP.sh
~/moodeaudio-cursor/scripts/maintenance/UPDATE_GHETTOAI.sh
~/moodeaudio-cursor/scripts/maintenance/MAINTAIN_TOOLBOX.sh
```

Network Test (From Home)

```
~/moodeaudio-cursor/scripts/network/TEST_NETWORK_CONFIG.sh
```

Why?

• Commands work from anywhere
• No need to remember to `cd` first
• Consistent behavior
• Easier for automation

Remember: Always use `~/moodeaudio-cursor/` paths when running commands from home!
